

VIJAY SINGH

Senior Software Engineer

Noida, Uttar Pradesh, India | 6006060338 | vijaysingh88@hotmail.com

PROFESSIONAL SUMMARY

Senior Software Engineer with 5.5+ years of experience in C/C++, JD Edwards EnterpriseOne, enterprise applications, debugging, system design, and production support. Hands-on experience across enterprise software development, application maintenance, performance optimization, and modern application technologies.

TECHNICAL EXPERTISE

Core Expertise:

- C / C++, JD Edwards EnterpriseOne
- Object-Oriented Programming, Data Structures & Algorithms
- System Design & Software Architecture
- Enterprise Application Development
- Debugging, Troubleshooting & Root Cause Analysis
- Performance Optimization, Production Support
- SQL / MySQL, Git, Docker

Professional & Modern Tech:

- JavaScript, Node.js, React, MongoDB
- HTML / CSS, REST / API Development, CI/CD
- React Component Development
- Node.js Backend Development
- Enterprise Application Integration
- Application Migration & Modernization
- Cloud / DevOps Environments

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Aug 2022 – Mar 2025

Agiliad Technologies – Noida

- Led end-to-end software development lifecycle activities for Caterpillar display configuration systems using C/C++ and JavaScript.
- Designed and developed a JavaScript-based ID management system with focus on scalability and maintainability.
- Investigated and resolved production and technical issues through systematic debugging and root-cause analysis.
- Collaborated with cross-functional teams to deliver production-ready software solutions.
- Participated in design discussions, code reviews, troubleshooting, and continuous improvement activities.
- Mentored developers and contributed to development best practices.

Application Developer / Consultant

Mar 2021 – Apr 2022

L&T Infotech – Bangalore

- Worked on enterprise migration from JDE to SAP, supporting secure and reliable data transition.
- Worked with Node.js for authentication and encryption-related application functionality.
- Developed React components as part of enterprise application development.
- Optimized SQL queries and supported database-related application performance improvements.
- Participated in application troubleshooting, development, testing, and production support.

Application Developer

Nov 2018 – Sept 2020

Oracle – Bangalore

- Resolved critical production and performance issues through debugging, log analysis, and root-cause

investigation.

- Worked on Oracle ADF applications and AIS V2 upgrades.
- Supported enterprise application enhancements, troubleshooting, and maintenance activities.
- Managed customer escalations and contributed to feature improvements.

Trainee Engineer

Jul 2018 – Nov 2018

Cattleya Technosys – Bangalore

- Built machine-learning-based security automation systems.
- Implemented YOLO for real-time object detection involving humans, helmets, and weapons.
- Worked on computer vision and machine-learning technologies for automated security applications.

INTERNSHIP

Intern

Jan 2018 – Apr 2018

Indian Institute of Remote Sensing (IIRS) – Dehradun

- Developed hyperspectral data processing tools using Python.
- Applied PCA, MNF, and K-means clustering techniques for hyperspectral data analysis.
- Built multi-dimensional visualization tools for satellite imagery.

EDUCATION

- **Master of Computer Applications (MCA)** – Pondicherry University (2015 – 2018)
- **Bachelor of Computer Applications (BCA)** – G.D.M College (2012 – 2015)
- **Higher Secondary** – Magadh University (2010 – 2012)
